

A Thematic Index to A.L. Twilight's Sermons.

The following index is an attempt to identify major themes to emerge from this collection of 20 sermons. In their original form, the sermons are in Twilight's hand-writing on pages that he numbered. Joan Huguenin's transcription notes these page numbers throughout. So the index indicates the sermon number, then the actual page in the original document. It should be noted that some pages are out of sequence, probably arising from the fact that Twilight altered parts of his sermons from time to time. When this occurs, the index follows the pagination that appears, and follows Ms. Huguenin's use of the symbol (sic). Furthermore there are some pages that are unnumbered, and that is also indicated in the transcription.
